## II. Image setup

- This template file has been reduced to **50%** of actual size to help reduce file size.  
Please ensure to use **300 pixels** per inch at full size for best graphic printing quality.  
However, in case if you don't have best quality pictures,  
please make sure to keep your resolution at 100-120 pixels per inch at full size.  
Scan/Photoshop files should be saved in CMYK mode as TIF or format.  
When placing such files in Illustrator DO NOT ARSE OR EMBED the file.
- Color mode should be **CMYK** to ensure best color matching.  
Any critical colors must be called out as a Pantone Code.  
Please DONOT use RGB color mode.
- It is best to convert all text to **Outline** and flatten all images to ensure that nothing is missed out or changed during the transfer of files.
- Using guidelines to remain within the margins will prevent mistakes and save your artwork elements from getting cut off.
- The "**Bleed Zones**" are hidden inside the hardware. However,  
it is **STRONGLY Recommended** that you extend your background graphics to the edges to the art board to ensure proper bleed with no visible unprinted areas.
- This file is itself a template and can be edited to design your graphics.
- Please make sure to delete this layer before submitting your artwork or it will be printed in your finished product.
- **PDF** is the best format to submit your artwork work.  
However, we also accept these file formats, as below:  
illustrator(**AI / EPS**) Photoshop(**Tiff**)
